

Lab 5: Project Management using Trello

Objectives:

- To understand the concept of project management using Trello.
- To learn how to create and organize boards in Trello.
- To manage tasks using cards, lists, and labels.
- To learn team collaboration features in Trello.
- To understand checklist and calendar integration in Trello.
- To improve task tracking and workflow management skills.

Theory:

Trello is a web-based project management and collaboration tool that helps users organize tasks visually. It uses boards, lists, and cards to represent projects and workflows. Trello follows the Kanban methodology, allowing users to track task progress easily.

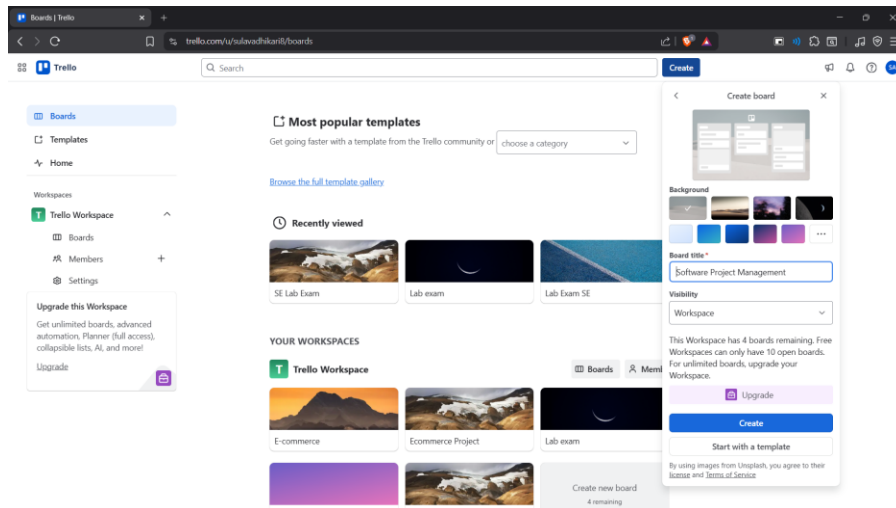

In Trello:

- Boards represent projects.
- Lists represent different stages of work.
- Cards represent individual tasks.
- Labels help categorize tasks.
- Checklists divide tasks into smaller activities.
- Calendar Power-Up helps manage deadlines and schedules.

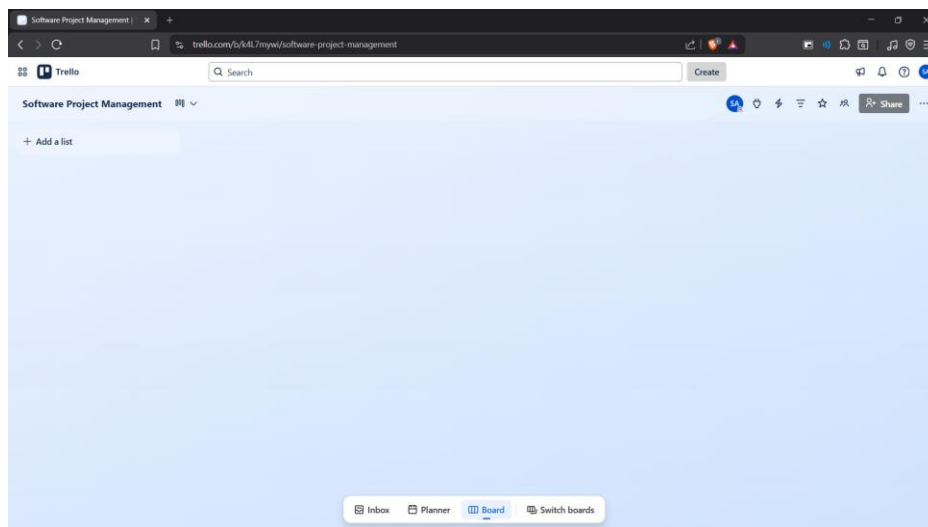

Trello is widely used for software development, team collaboration, task management, and productivity improvement.

Steps / Procedure:

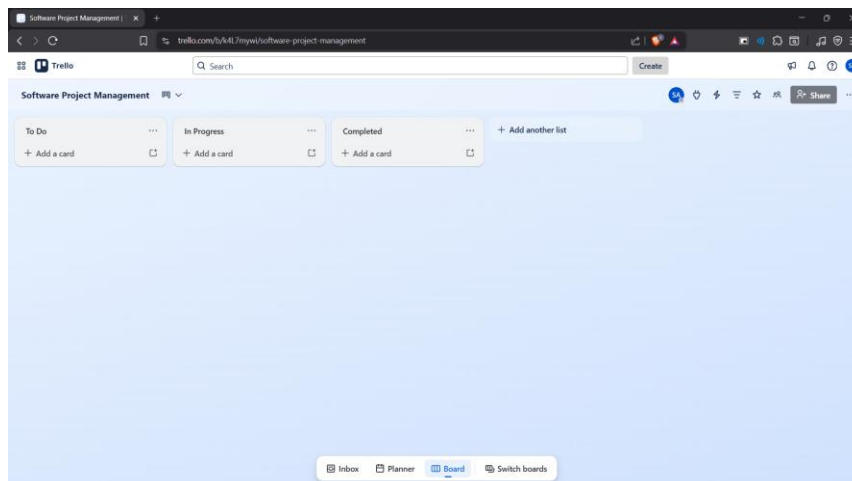

1. Create a New Board

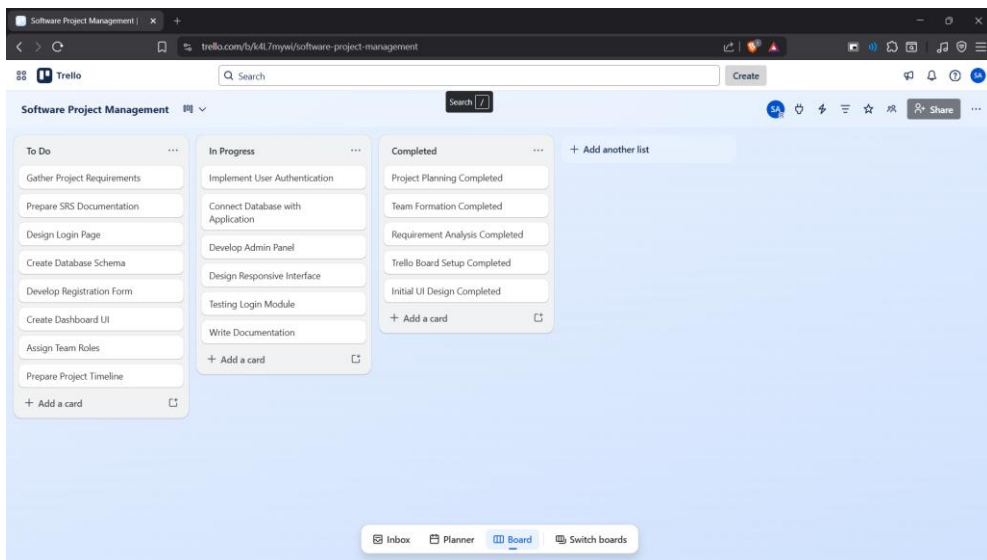

2. Give Board Name and Create Board

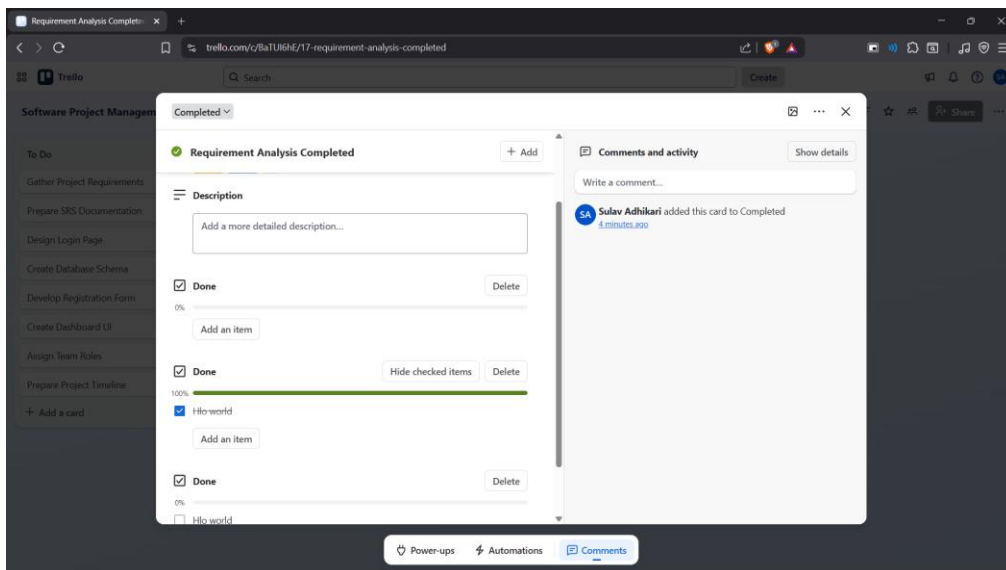

3. Add Lists

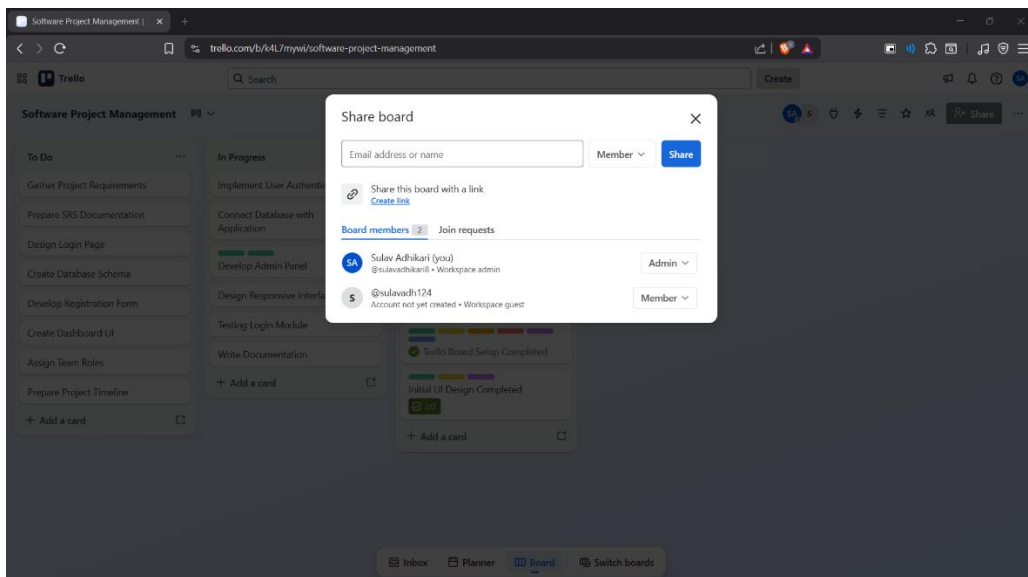

4. Add Cards inside Lists

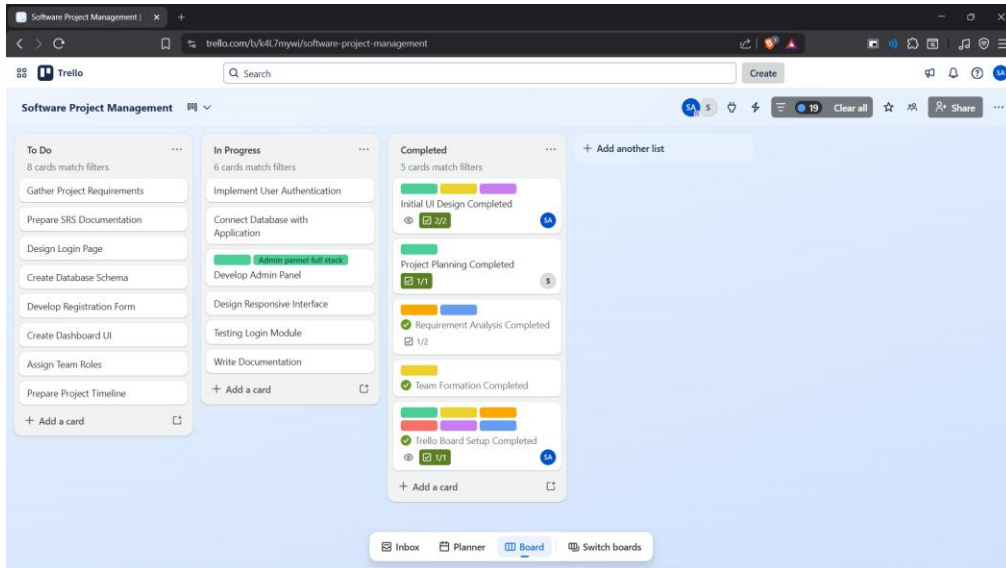

5. Open and Edit Cards

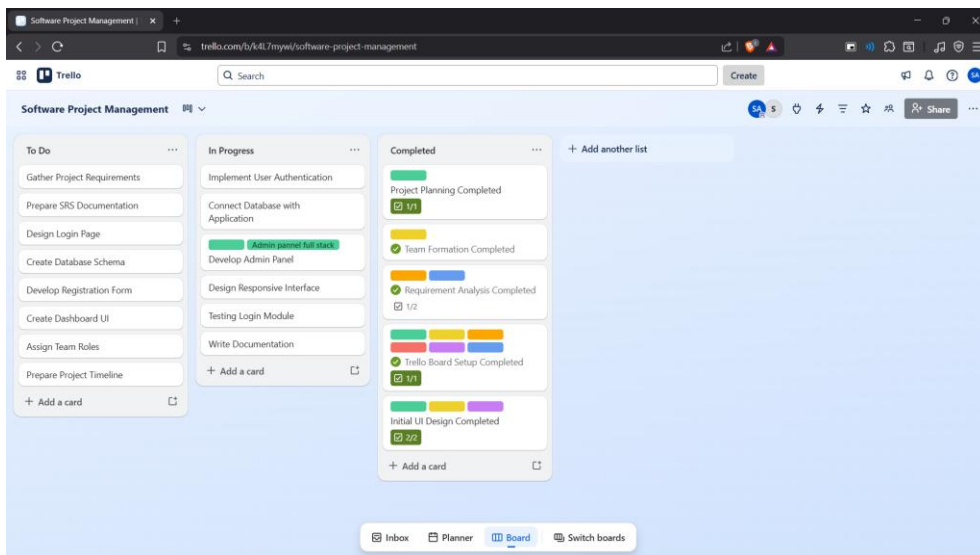

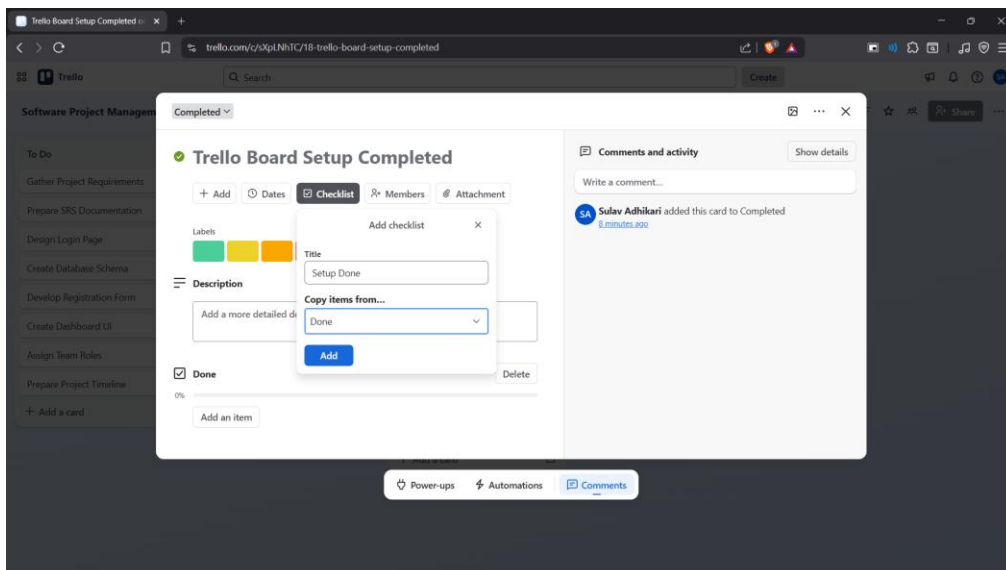

6. Add Team Members for Collaboration

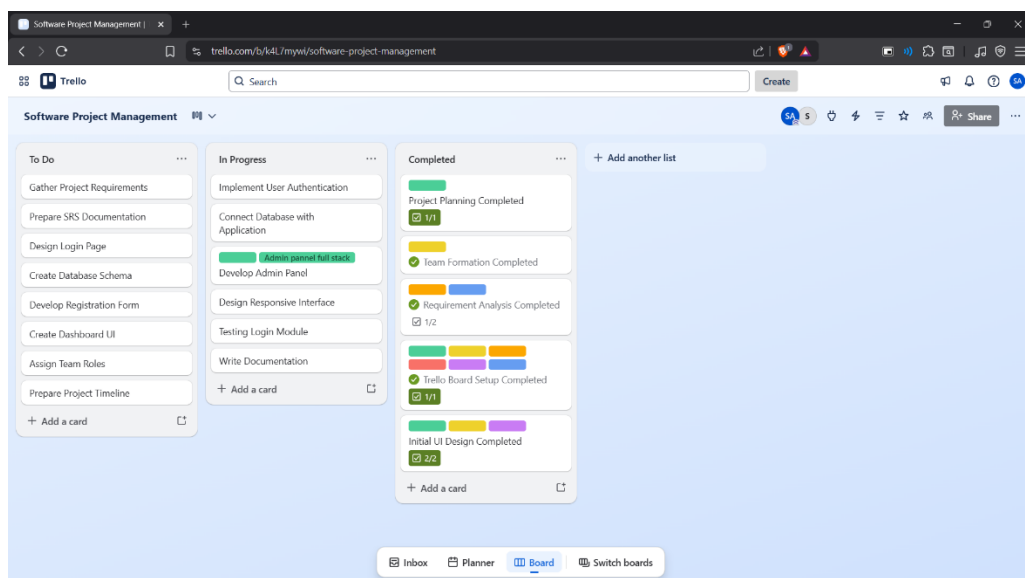

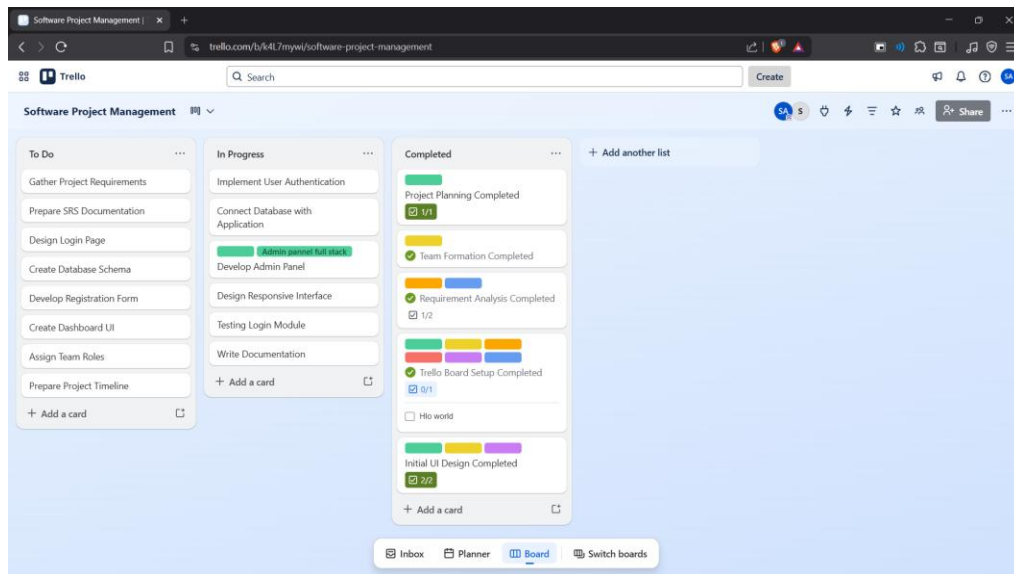

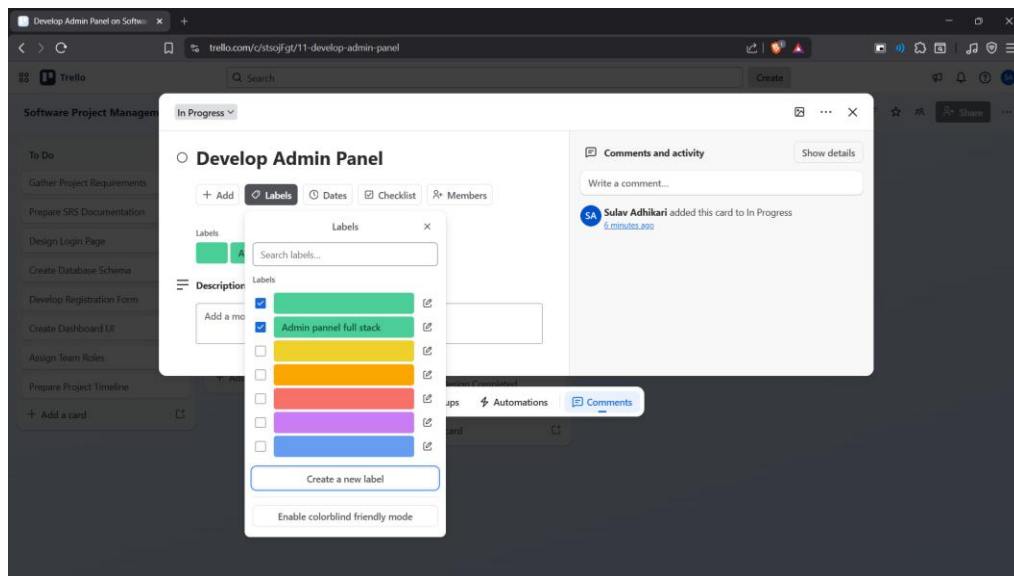

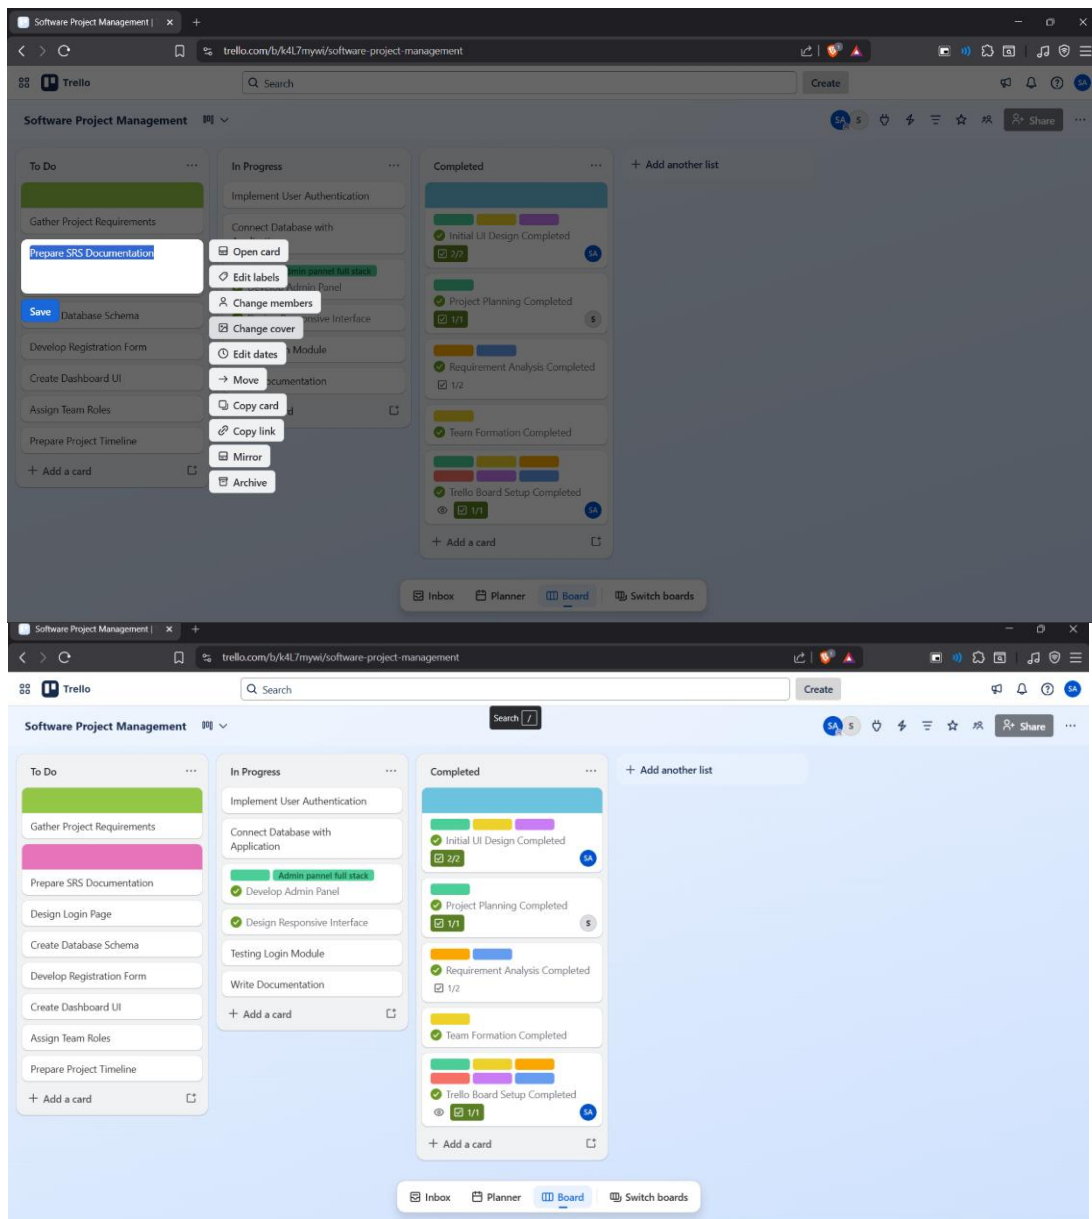

7. Create Checklists inside Cards

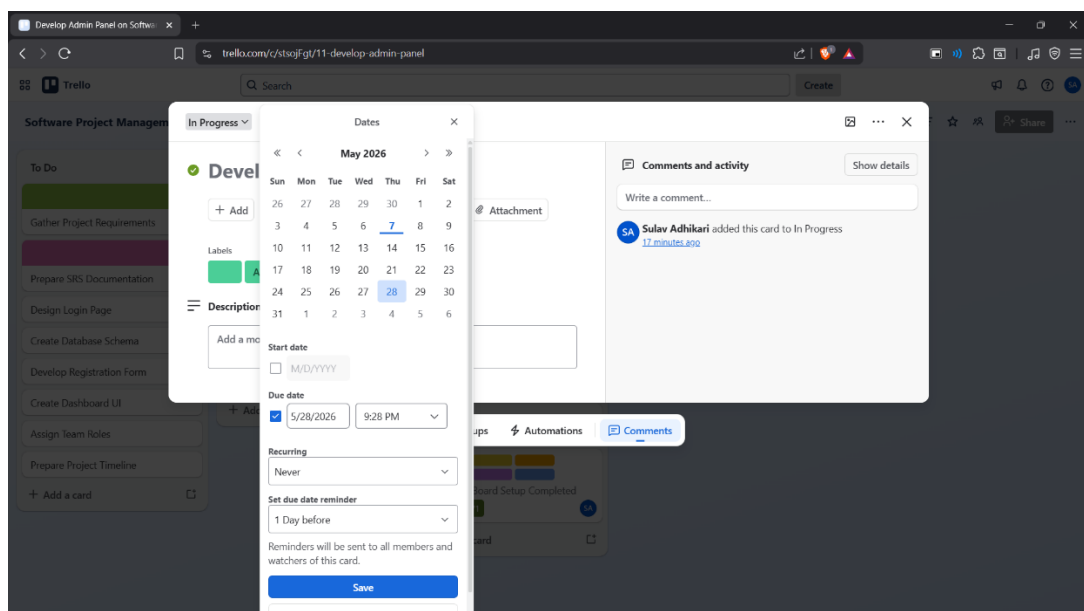

8. Add Labels to Cards

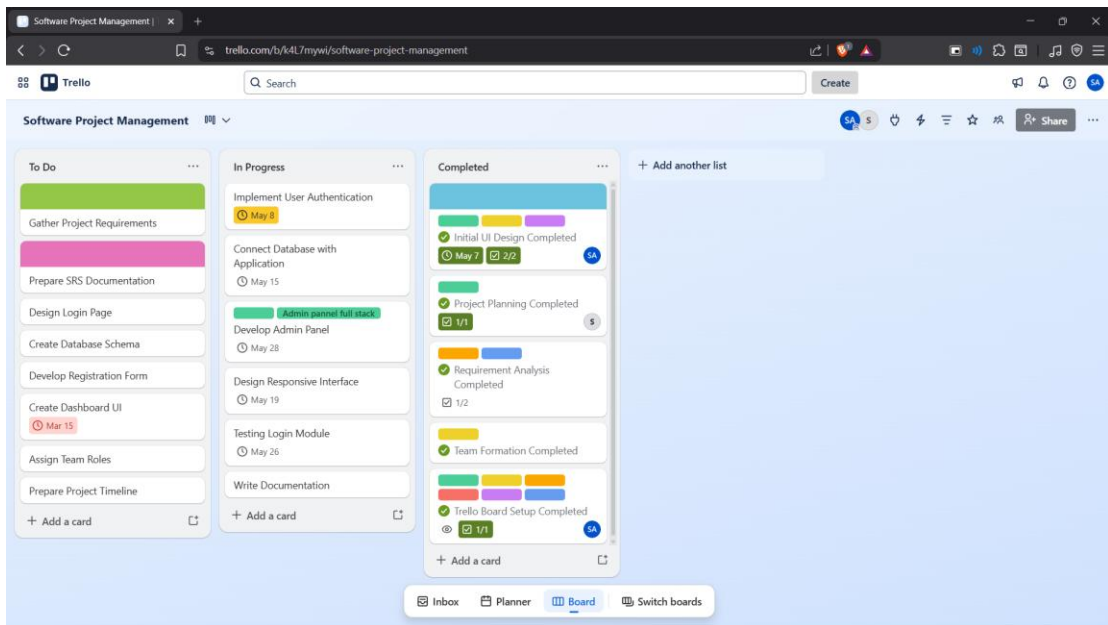

9. Change Background or List Colors

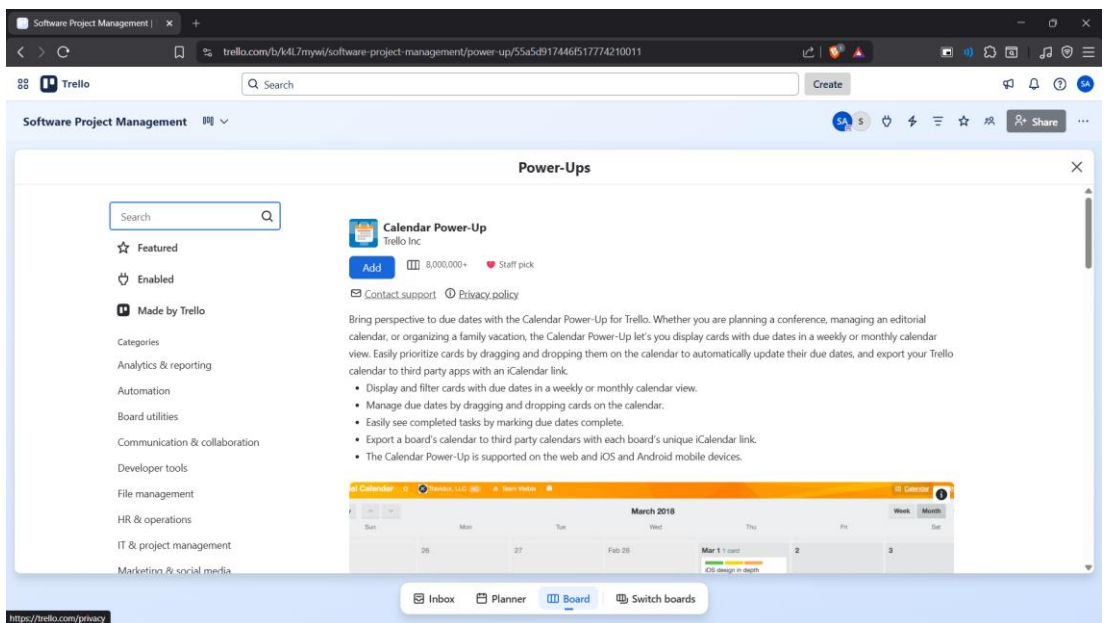

10. Add Due Dates to Tasks

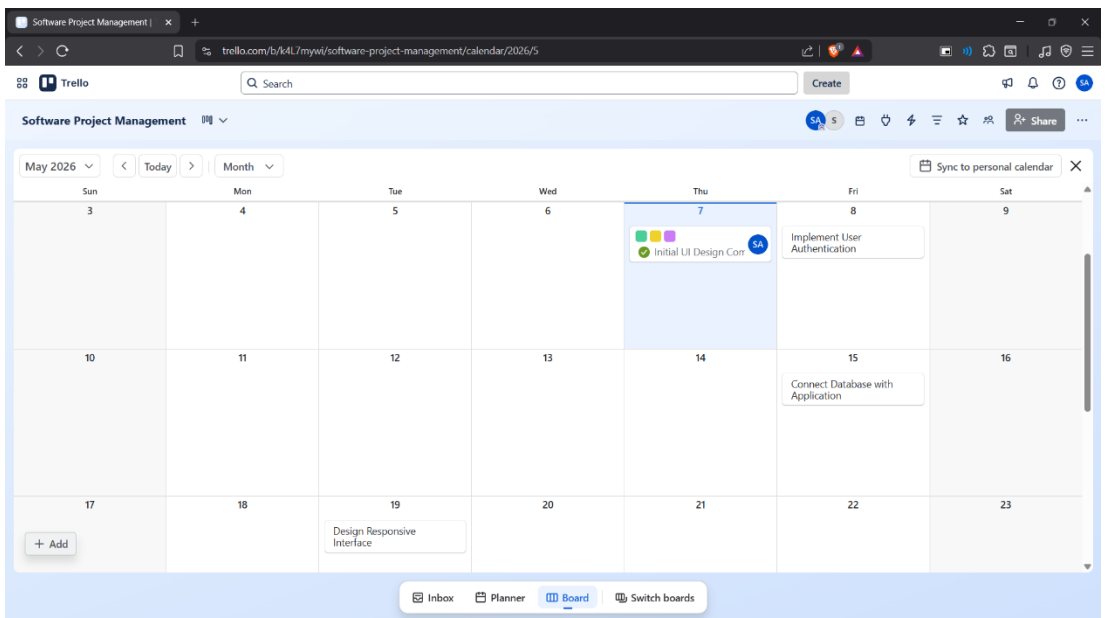

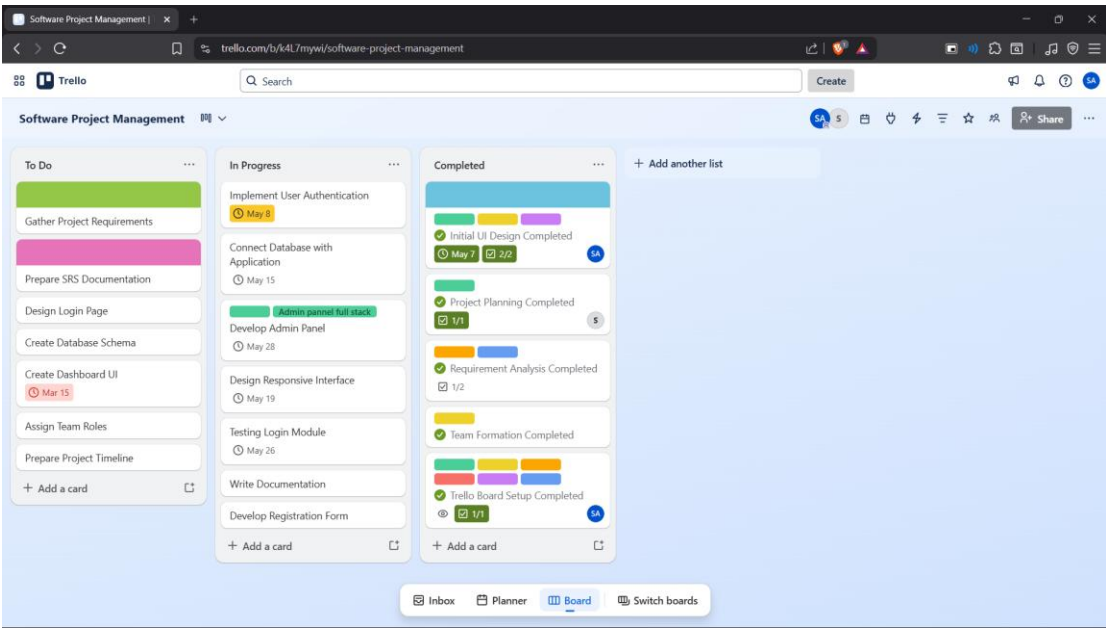

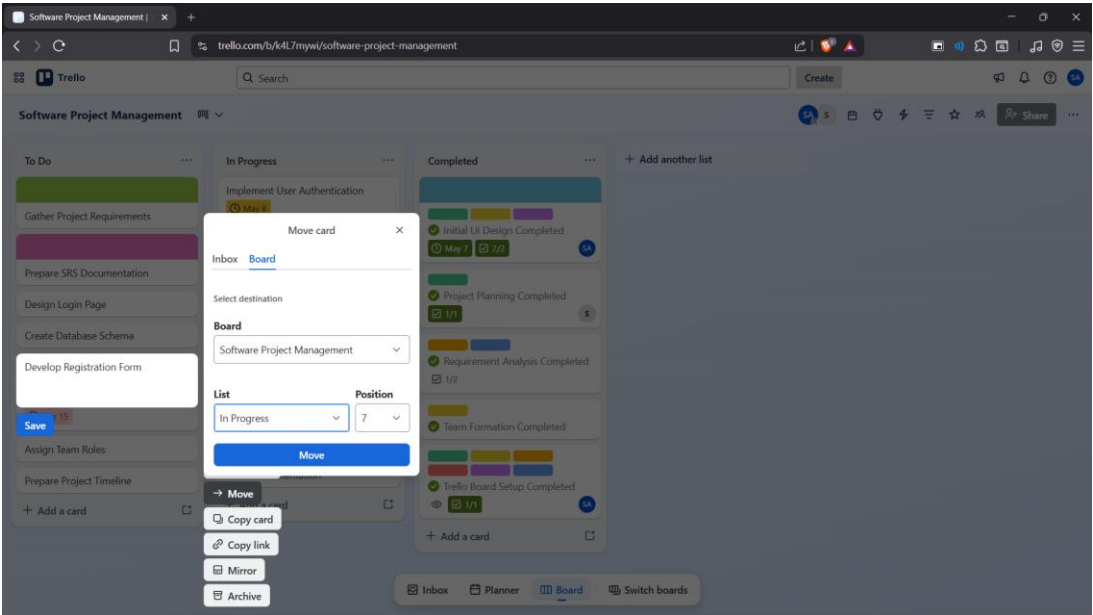

11.Enable Calendar Power-Up

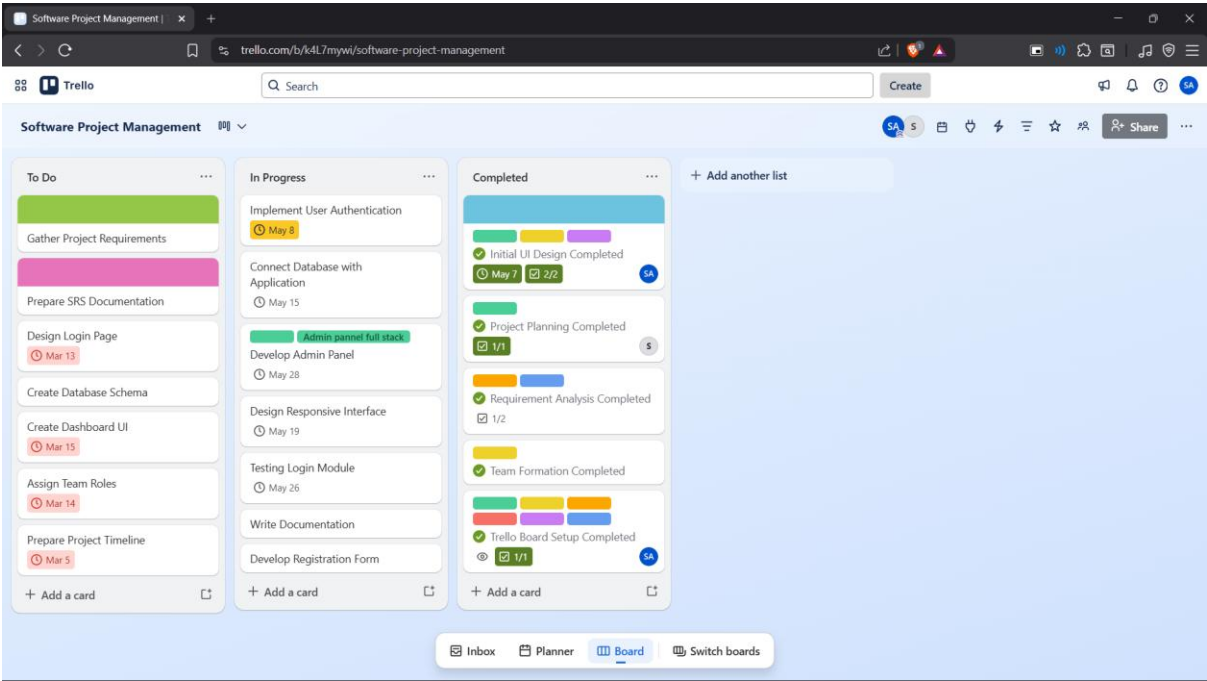

12. View Tasks in Calendar

13. Move Cards between Lists

14. Final Board Output

Conclusion:

In this lab, Trello was used to manage and organize project tasks effectively. Different features such as boards, lists, cards, labels, checklists, and calendar integration were explored. The lab helped in understanding visual project management and team collaboration using Trello.
